

LED Upgrade Kit (XL20/21/50 Series)

Product Key Features:

Complete Upgrade Kit: The retrofit LED Upgrade Kit includes all parts required to upgrade applicable lamp based engines with Mitsubishi's latest LED engine technology

Compatibility: The Upgrade Kit is compatible with Mitsubishi XGA, lamp based Display Wall Cubes (20/21/50 Series).

Upgrade in resolution: (XGA -> SXGA+) available.

Cost Savings: Retrofitting existing display walls provides significant cost savings and drastically reduces customers down time (Net necessary to replace cabinets, screens and pedestal units).

Individual RGB LED's offer wider colour gamut for enhanced colour reproduction.

Unparalleled picture performance due to Mitsubishi Electric original technologies 'Colour Space Control', 'Digital Gradation', and 'Dynamic Colour & Brightness Balancing' circuits.

Reduced maintenance cost: No colour wheel; long-life cooling fan (100,000 hours); and long-life LED (100,000 hours).

LED Upgrade Kit Model Name		VS-XE73RU [XGA -> XGA]	VS-PE73RU [XGA -> SXGA+]
Technology and Resolution		DLP XGA	DLP SXGA+
Light Source		LED (RGB), Air-cooling	
Light Source Redundancy		YES	
Light Source Life Time (Average)		100,000 Hrs (Adv. Eco Mode)	
Cooling Fan Life Time (Average)		100,000 Hrs	
Key Features	Colour Space Control	YES	
	Digital Gradation	YES	
	Colour Brightness Balancing	YES	
	Option Board Selection	YES
